

BACHARACH®

Indoor Air Quality (IAQ) Analyser

for the monitoring of Carbon Dioxide, Oxygen, Carbon Monoxide, temperature and humidity

The Bacharach Europe IAQ analyser is specifically designed to monitor CO₂ and O₂ as well as temperature and humidity for all indoor air quality applications. The range of gases to be monitored with the analyser is extended to include CO.

The unit utilises field proven infrared and electrochemical cell technology and provides the user with a fast and simple to operate measuring tool.

Benefits

- Highly portable
- Fast indication of all parameters
- Easy to use
- Readings automatically stored
- Continuous use

Features

- Handheld / ergonomic design
- Proven technology
- Simple, menu driven operation
- Datalogging facility
- Full day operation from one charge

Applications

- General indoor air quality monitoring and checks
